## About Me

---

I am a person who believes in the importance of innovation, cooperation, integrity and empathy. I have a goal to have a positive impact, both in my own life and for others. Currently, I am studying Data Science and am very interested in technology, especially how data can be used to create new solutions and solve complex problems in various fields such as health, business, and the environment and others. In the future, I want to become an expert in this field, create meaningful solutions, and make a real contribution. I also want to be involved in projects that combine technology, data analysis and innovation to bring about positive change. I am always motivated to learn new things, solve problems, and help others.
