I am a Data Science graduate from Telkom University with academic and practical experience in machine learning, data analytics, data engineering, and business intelligence. Developed hands-on skills in Python, SQL, TensorFlow, PostgreSQL, and ETL development through thesis research and internship projects. Experienced in building AI-powered applications, data warehouse systems, and end-to-end analytical solutions. Adept at collaborating in team environments and leading cross-functional initiatives, demonstrated through multiple organizational leadership roles. Passionate about building scalable, data-driven solutions that create meaningful impact.

Work Experience

PT Prasetya Dwidharma - Jakarta, Indonesia

Jul 2025 - Aug 2025

Data Analyst & Data Engineer Intern

Innovative Technology Integrator & Telecommunications Infrastructure Company

- Managed and maintained PostgreSQL databases using backup data of approximately 45 GB in .sql format to support operations and ERP migration projects.
- Extracted and prepared datasets using SQL queries from multiple PostgreSQL tables for ERP migration processes.
- Performed data cleaning and validation to resolve null values, duplicates, and inconsistencies, ensuring data accuracy and readiness.
- Conducted cross-checks between PostgreSQL, Excel, and ERP/Odoo to verify consistency across different systems.

Education

Universitas Telkom - Bandung, Indonesia

Sep 2022 - Jan 2026

Bachelor of Data Science, 3.67/4.00

- Relevant Coursework: Machine Learning, Data Visualization, Deep Learning, Big Data Analytics, Data Warehousing, Business Intelligence

Organisational Experience

Himpunan Mahasiswa Data Science - Universitas Telkom, Bandung, Indonesia

Mar 2024 - Jan 2025

Member of Publication and Documentation Division

- Contributed to weekly content production and upload of VODs across TikTok and Instagram.
- Created a company profile video for the organization and supported visual content development for YouTube.
- Assisted as observer and livestream operator for online competitions, managing content delivery across Instagram, TikTok, and YouTube.

LEVIATHAN - Universitas Telkom, Bandung, Indonesia

Sep 2024 - Sep 2025

Head of Publication and Documentation Division

- Led a team of 5 members in handling publication and documentation activities for organizational events.
- Produced and managed visual outputs including event photos, recorded videos, and Instagram feed content.
- Oversaw social media content creation and upload workflow to maintain consistent Instagram presence.

Technical Skills & Projects

Technical Skills

Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, PostgreSQL, ETL, Data Migration, Matplotlib, Seaborn, Power BI, GitHub, Microsoft Excel, HTML, CSS

Projects

- Personal Website** : Developed a personal website to showcase my profile, skills, and selected projects in a clean and accessible format.
- Anomaly Detection in Oil & Gas Operational Data using Transformer Models (Thesis)** (2026): Implemented anomaly detection on ~300,000 operational data points using three transformer-based models: Transformer Autoencoder, TranAD, and Anomaly Transformer. Conducted comparative performance evaluation to assess the effectiveness of each model in detecting anomalies in industrial operational datasets.
- Peninemat** (2026): Developed an AI-powered movie assistant using LLM API, Python, and PostgreSQL to generate interactive movie recommendations
- Data Warehouse and Business Intelligence System** (2025): Designed and implemented a Data Warehouse and Business Intelligence system to support monitoring and data-driven decision making, serving as the project lead in a group project.
- Sentiment Analysis with C-LSTM Architecture** (2025): Implementation of sentiment analysis on text data using the Convolutional Long Short-Term Memory (C-LSTM) architecture, conducted as a group project.
