I am a Data Scientist. I graduated from Telkom University, Bandung. My primary interest lies in using data to develop innovative solutions and address real-world problems across various sectors, including business, healthcare, and the environment. I continue to develop my skills in data analytics, machine learning, and other core areas of data science. Outside of academics, I am actively involved in student organizations, where I have gained valuable leadership, teamwork, and communication skills. Driven by a strong desire to learn and a commitment to solving complex problems, I aspire to become a data science professional contributing to impactful and meaningful projects in the future.

Work Experiences

PT Praselia Dwidharma - Jakarta, Indonesia	Jul 2025 - Aug 2025
<i>Data Analyst & Data Engineer Intern</i>	
- Managed and maintained company databases using PostgreSQL to support daily operations and data migration projects. - Extracted and prepared datasets with SQL queries, structuring outputs in Excel for migration to ERP systems. - Performed data cleaning and validation to resolve null values, duplicates, and inconsistencies, ensuring data accuracy and readiness. - Conducted cross-checks between PostgreSQL, Excel, and ERP/Odoo to verify consistency across different systems. - Supported the IT team in database operations and created documentation for data preparation and validation workflows.
